

Key Features & Benefits

KitWare

Pipe Wear Sensor for Deck & Boom Pipe Kits

Customer Benefits

Simplify Inspections with a NFC-enabled smartphone

Save time and money. Hold your phone over the KITware tag and the pipe's condition is automatically detected, displayed and recorded. No disassembly of pipes, no use of UT devices or calipers. Inspection data is organized by kit, recorded and uploaded to the cloud. Records are accessible 24/7 from any device.

One-click Ordering

Order replacement pipe(s) directly during inspections or mark the pipe for replacement and generate a customizable report, purchase order or email.

Electronic Records and Reporting

Automatically generate inspection reports for documenting Best Practices. Minimize errors and report delivery time. Document and report problems, failures and other issues.

Reduce Risk

Eliminate job-site blowouts, down time and damages due to worn pipe.

Manufacturer Benefits

A Low Cost Value-add that Earns Its Keep

Drive Sales

Drive sales with cloud-based data collection of product performance and predictable EOL. **Connect with your customer when they are making a purchasing decision and solve their problems with one-click hassle-free ordering.**
